ABOUT US

In Peccatum Craft Beer is born in 2013, under the commercial brand Cerveza Keltius, brewing Belgian style beers in a small brewpub in the city of Ourense.

Little by little our company grows and rises new markets, from the local to the autonomous area, and later to the national area. At the same time, the range of beers keeps on growing, giving free rein to our creativity and to the demand from the market of new styles.

Our inflection point came in 2015 when we released the official beer of the most important rock band of our land, Los Suaves. At the same time, we began expanding our market abroad. All this led in the decision of

leave aside the brewpub and move to an industrial area, focusing 100% in brewing and distributing, as well as purchasing new and bigger equipment which allowed us to triple our brewing volume and automate a wide part of the process.

At the present time, we have presence in 7 different countries all around the world, we produce more than 35 different references in three formats: can, bottle and keg, and we aim to continue growing and improving the quality of our beers day by day.

OUR PRODUCTS

The company is able to produce any kind of beer of high and low fermentation. They are packaged in 3 different containers: 33 cl bottles, 33 cl cans or non-returnable 20 L or 30L kegs. In Peccatum beers usually carry the company's name, however, they can be customized to a client's brand.
